The present invention relates to a mass spectrometer. In a magnetic sector mass spectrometer the magnet system is comprised of a main magnet having a magnetic axis perpendicular to the beam axis of the analyzer and whose field is provided over its whole length by a solenoid coil. The permanent magnet of a first analyzer pole is aligned with the magnetic axis of the main magnet. The main magnet has further a pair of end magnet systems which are opposite one another in relation to the magnetic axis. Each of the end

magnet systems is comprised of a permanent magnet having a field of predetermined shape (dipolar) and a permanent magnet having a field of an opposite shape (quadrupolar) as well as a respective pair of coils which are connected to a current source. A second analyzer pole which cooperates with the first pole has a permanent magnet which cooperates with the field of the first pole. The
